WORK EXPERIENCE

- Nov 2020 - Apr 2021

Backend Developer
An internship group project aims at creating a screen-based user interface for A&E wristbands managed and owned by The Cerberus Security Laboratories Team.
My main responsibility includes:
 - Building the server architecture and server communication using tools such as **GoLang** and **GraphQL**.
 - Creating a dummy data generation tool in **Python** to facilitate API and smoke testing.
- Oct 2020 - May 2021

Full-stack Developer
The project is an Emotion-Based Music Streaming App leveraging **Vue 3, Node, Spotify API** for song searches and audio streaming.
 - It prioritises user's moods to enhance the song selection process.
 - It is used to speculatively propose a new screen-based behaviour using a map for content discovery.
- Aug 2021 - Present

Software Engineer
Voly Ltd, Cheadle, England, United Kingdom
Voly is an accounting solution created by yachting professionals, focusing on yacht management.
My role at the company includes:
 - Resolving **bugs**, optimising **user interfaces** while technically implementing new front-end components.
 - Developing internal tools to enhance the developer experience for colleagues and myself (**VSCode extension, Storybook addon, Bitbucket Forge app**,...).
 - Utilising **React, Svelte, Storybook** for component development; **Jest** for unit testing and **Claude Code** as an AI development agent to accelerate debugging and code generation across the codebase.

EDUCATION

- Oct 2018 - May 2021

Bachelor of Science
University of the West of England, Bristol, England
I took part in Digital Media course to learn about anything technology wise.
Subjects which were covered during my studying were Designing (Adobe suites), 3D-modeling & animation (Maya, Blender, ZBrush,...), Creative Coding (p5.js), Web development and many more
- Sep 2016 - Apr 2018

IT (Networking)
Ho Chi Minh city International University
I studied for a bachelor degree in Ho Chi Minh city, Vietnam for 2 years, then proceeded onto moving to the UK and continued my studying.
Because it was a connecting programme with the UK, I didn't finish my degree there in Vietnam. However, I was able to learn about C / C++, Assembly, and other low-level engineering skills such as Networking and Arduino.
